

How To Make A Fleece-Tie Blanket

Get two pieces of fleece of equal size, usually one is solid in color and the other a print. (Sizes: **Baby/Toddler:** 1-1/4 yard **Child:** 1-1/2 yard **Adolescent:** 1-3/4 yard **High School:** 2 yards) **Materials needed:** Sharp fabric scissors or cutting wheel, fabric, ruler or measuring tape (if needed)

Follow the steps below:

Lay fleece on a flat surface. The curled edge is the 'right' side of the fabric, so should be facing down for bottom piece and up for top piece. **Trim off rolled edge.**

Cut one 4 inch x 4 inch square out of each corner.

Cut 1 inch wide x 4 inch long strips (match up with the corner size). Cut all around the perimeter of the blanket. Its important not to move the blanket once you have cut the strips.

Once strips are cut all the way around the blanket, tie a double knot using the printed fabric and the solid fabric directly below it.

Continue to tie knots all the way around the blanket

Once you have tied the entire blanket, you are done! If the blanket is puckered from the knots, just **give it a good stretch and it will lie flat.**
